

VERSILIC® SPX-70 I.B. High Strength Silicone Hose

Versilic® hose, produced from a proprietary combination of silicone elastomers, provides durability and versatility in a range of applications.

Designed for Demanding Requirements

Peroxide-cured Versilic® Silicone Hose Formulation SPX-70 I.B. is designed for use in applications where flexibility, resiliency and durability are required. Produced from a proprietary combination of silicone elastomers, Versilic® Silicone Hose optimizes critical physical properties such as tensile strength, elongation and compression set, resulting in a more physically durable product. Its smooth inner surface reduces the risk of particulate entrapment and microscopic buildup during fluid transfer.

Consistently Reliable Results

Every lot of raw material used in the manufacture of Versilic® Silicone Hose undergoes a series of in-house physical property testing before use. This stringent evaluation of ingredients helps to provide the repeatable quality found in every foot of Versilic® Silicone Hose. Annual testing on actual hose samples is performed for reaffirmation of adherence to USP Class VI Criteria. Heavy metals extraction analysis as well as cytotoxicity testing is performed to confirm the hose's biocompatibility.

Complies with Regulatory Guidelines

Versilic® Silicone Hose complies fully with the requirements of the USP Class VI Criteria and is entirely non-toxic, non-hemolytic and non-pyrogenic. It also meets 3-A Sanitary Standards, FDA 21 CFR PART 177.2600 Criteria and NSF 51 Standard.

Saint-Gobain Performance Plastics: The Leader in Silicone Hose Innovation

Versilic® Silicone Hose provides versatility in use for a broad range of applications. However, for situations requiring uniquely engineered properties, Saint-Gobain Performance Plastics can design a formulation suited to meet your specific needs. Specialty formulations may be designed to provide a combination of features, including ultra-high temperature resistance, electrical conductivity, closed cell sponge, pigmented colors and long flexural life.

BIOPHARMACEUTICAL PRODUCTS

High-strength silicone hose ideal for veterinary, medical and pharmaceutical applications

Features/Benefits

- Provides Resiliency, Long Life and Durability
- Ultra-Smooth Inner Bore Reduces Risk of Particulate Entrapment
- Tough Braid Reinforcement Permits Use Under Elevated Working Pressures
- Taste and Odor Free
- Withstands Repeated CIP and SIP Cleaning and Sterilization
- Temperature Resistant from -112°F to 320°F

Typical Applications

- Veterinary Pharmaceuticals
- Sterile Filling and Processing
- Water Purification Systems
- Cosmetic Production
- Beverage Dispensing
- Food and Dairy Processing
- High Temperature Chemical Processing
- Sanitary Fitting Assembly

*Working pressures are calculated at a 1:4 ratio relative to burst pressure using ASTM D1599.

The values listed for working and burst pressures are derived from tests conducted under controlled laboratory conditions. Many factors will reduce the hose's ability to withstand pressures, including temperature, chemical attack, stress, pulsation and the attachment to fittings. It is imperative that the user conduct tests simulating the conditions of the application prior to specifying the hose for use.

VERSILIC® SPX-70 I.B. Silicone Hose Typical Physical Properties
